- 360-degree rotating discharge chute
- Powder-coated finish
- Self-contained hydraulic system run off tractor PTO

MCM SA is proud to offer the TM86H model Wood Chipper capable of devouring up to 200mm of material with ease. This model is driven by your tractor's PTO at 540rpm.

Thanks to the TM86H's automatic hydraulic feeding system, safety and performance is increased. Simply insert the material and watch as the TM86H pulls the material into itself while slicing through it like butter.

The TM86H model was engineered to be the best-value entry-level chipper on the market. From the powder-coated reinforced build, to the enlarged hopper opening, the TM86H will exceed your expectations.
